

Please do not replace my K-LOVE radio station with a LPFM. I do not care for the majority of what comes on the radio or t.v. but this station is positive, uplifting, and encouraging. I believe the negative message that comes from most areas of broadcasting is one reason people are so depressed. K-love offers an encouraging message that we are loved and justice will be served when it is all said and done. Its good to know that man is not the highest being on the planet, that idea alone is depressing. Teen suicide is up 300% since 1950, not to mention the increased adult suicide. K-love offers a better option.
